Output Selection in Windows 7 / 8

Follow the below steps to set your standard sound card for system-wide audio playback in the Windows Sound Settings:

- 1. Click on the Windows symbol in the bottom left corner of your screen, type in 'Sound Settings' and press ENTER.
- 2. In the **Sound** panel, click the **Playback** tab.
- 3. If your sound card has multiple channels, they will appear seperately in the **Playback** list. Select the output channel you want to use as system output.
- 4. Click **Set Default** in order to set the selected output as your default system audio output.
- 5. Click **OK** to confirm your selection.

Select a p	playback device below to modify its settings:	
Z	Audio 8 DJ (Ch A, Out 1 2) 3- Audio 8 DJ Ready	
	Audio 8 DJ (Ch B, Out 3 4) 3- Audio 8 DJ Ready	
	Audio 8 DJ (Ch C, Out 5 6) 3- Audio 8 DJ Ready	
Z	Audio 8 DJ (Ch D, Out 7 8) 3- Audio 8 DJ Ready	
	ATI HDMI Output ATI High Definition Audio Device Not plugged in	
0	Speakers and Headphones	-
